“Seeding the Future”

Wednesday 27, January 2021

To all Friends and Supporters of SHAK Junior School - Bulabakulu

Dear friends of Children,

RE: Vote of thanks and update on School Developments

I hope all of you are doing well.

On behalf of the Shak Junior School community, I am very excited to report to you that we have successfully managed to purchase the long awaited second school van and I wish to officially present it to you in the pictures below! What a great joy!

I wish to once again state that this great achievement and long awaited dream has been realized because of God's grace who enabled you to generously contribute funds for this noble cause.

In a special way kindly allow me to thank Mr. Klaus Gresser, the Board Chairman and Ms. Ricarda Simon the second Board chairman of the Shak Junior school Friends' Association, for spearheading and championing the resource mobilization efforts whose outcome has brought us this far! We are so grateful!

I am also highly indebted to thank all of you our dear friends and supporters in Germany for the selfless love and support you have extended to our school in an effort to improve and uplift the education standards and learning environment for the

vulnerable children at Shak Junior school, by unconditionally donating funds to us to implement our desired development plans. Thank you!

I would like to assure you that '**whatever small contribution you make counts a lot to us and it's very much appreciated**'. It is those small bits collected together that step by step hatch into unbelievably BIG achievements like this! We unbelievably started this journey with 50 euros...!!!

Our commitment to you is that we shall always take good stewardship of all the resources you extend to us because we are cognizant of the fact that every euro counts and we shall always strive to make sure that we assign every euro where it is purposed to be on spent in on what it is donated for in a very transparent way.

Our next biggest project is the installation of a reliable Water supply system at the school by drilling a borehole unit. Meanwhile I wish to update you that, amidst all the financial challenges, we are locally making efforts to expand the classroom space for the learners by constructing the next two rooms on our planned school block. This is basically to enable us cope with the COVID19 challenge which calls for better spacing of learners in classes. (Social distancing). Construction

works are in progress using bricks that were locally baked at school last year (2020). The main challenge on this task is the roofing phase which is quite costly. We need approximately 1,900 euros to roof this extension when the brick works are done. Probably in the next 2 weeks. We shall appreciate any hand of support on this task.

Thank you so much and may the good lord bless you and reward you abundantly

Saad Luyinda
Director,
Shak Junior School - Bulabakulu
